The San Diego Regional Climate Collaborative is a network for public agencies that serve the San Diego region to share expertise, leverage resources, and advance comprehensive solutions to facilitate climate change planning. By partnering with academia, non-profits, and businesses, we also work to raise the profile of regional leadership.

**24** Member Organizations
Representing **80%** (2.6 million) of the County population

**12** Cities with Climate Action Plans
Adopted or under development

**1** Sea-level Rise Committee
Coordinating 7 cities, the Port, Airport, U.S. Navy and local science experts

**>500** Participants at Trainings
Raising the capacity, expertise, and leadership for public agency staff at no cost

**$700,000** in Grants Awarded
The only California recipient of the NOAA Regional Resilience Grant to improve coastal planning resilience strategies

MESSAGE FROM THE DIRECTOR

In 2016, the Climate Collaborative had its most successful year yet in seeding climate-focused initiatives across the County. We kicked off the year with a big win securing a NOAA Coastal Resilience Grant for climate resilience planning. With this funding, we are expanding our capacity to provide technical expertise to local jurisdictions for coastal flood planning.

Our workshops also had record breaking attendance and advanced regional expertise in climate planning, climate science and the climate-water-energy nexus. Building on this momentum, our membership continued to expand and we now proudly represent over half of the cities in San Diego County.

At the same time, we made a name for ourselves on the state and national stage, with several publications showcasing us as a model for advancing actions to address climate change through regional collaboration. Looking forward, I am excited to expand and strengthen the San Diego region’s community of leaders and hope you will join us.

- Laura Engeman
