

IRENA at 10

Post Paris Transitions and Energy Diplomacy Beyond OPEC and the Energy Charter Treaty

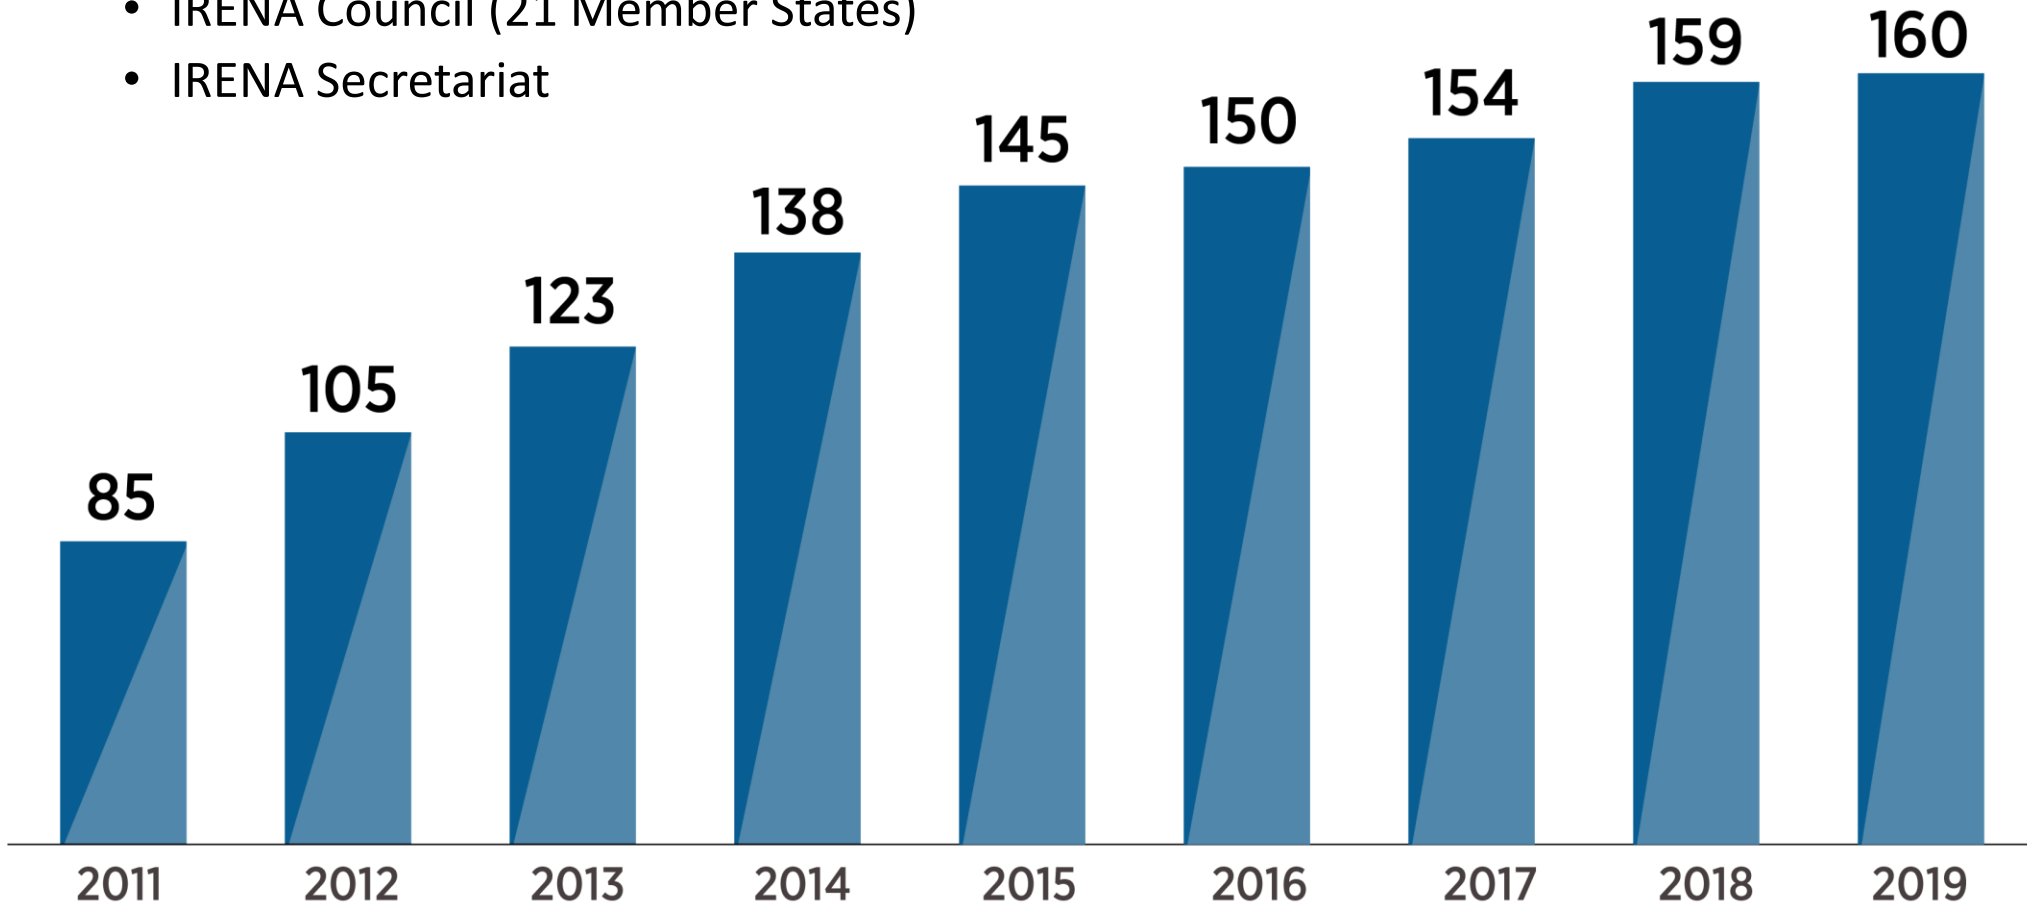

Nadia B. Ahmad, JD, LL.M

Associate Professor of Law

Barry University School of Law

November 8, 2019

- IRENA Initiative (April 2008) → IRENA Statute (January 2009)
- 160 countries signatories
- Organization
 - IRENA Assembly
 - IRENA Council (21 Member States)
 - IRENA Secretariat

IRENA Statute (2009)

- Adoption of renewables with view of sustainable development
- View of renewables as offering energy security and price stability
- Reduction in greenhouse gas emissions
- Decentralization of energy access for poor, rural and developing areas
- Concern of negative implications of fossil fuels and the inefficient use of traditional biomass on health
- Energy efficiency for global energy needs
- International organization for cooperation and collaboration

IRENA HQ

The UAE's highest Estidama* design and construction rating to date

IRENA HQ has won:

Sustainable Construction Project of the Year, BGreen Awards 2014

Green Project of the Year, Big Project Awards 2014

Green Building of the Year - Commercial, EGBC Awards 2015

The 1,000m² solar PV rooftop system produces **305,000 kWh** of electricity per year

Solar water heater system produces heat equivalent to **27,850 kWh** of electricity per year

75% of the heat energy in the exhaust air is recovered by the air conditioning system

Up to **95%** of energy generated from lowering elevators is harnessed and reused throughout the building

Requires **50%** less water than typical buildings in Abu Dhabi

75% of the building's hot water demand is supplied by solar water heaters

Uses **64%** less energy than typical buildings in Abu Dhabi

Uses **42%** less energy than global energy-efficiency standards

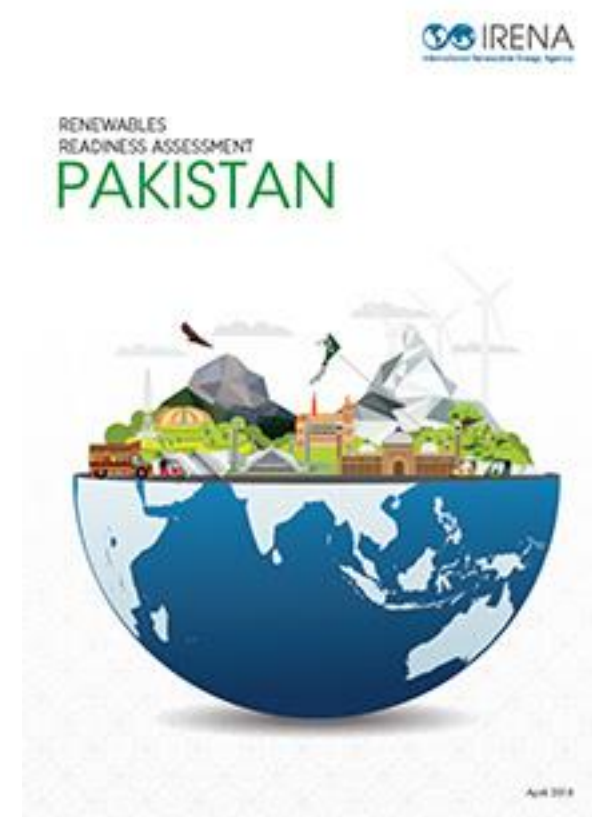

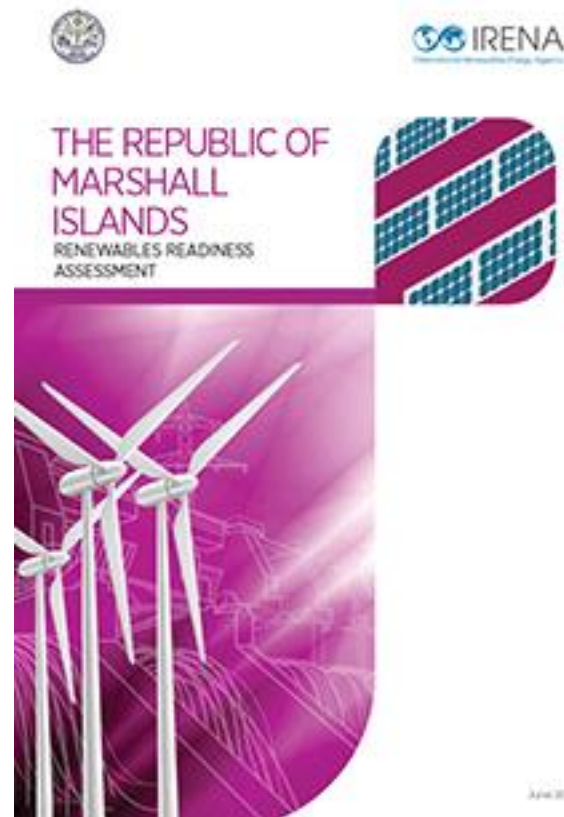

Features charging stations for **26** electric vehicles

IRENA - An Integral Part of Masdar City's Ecosystem

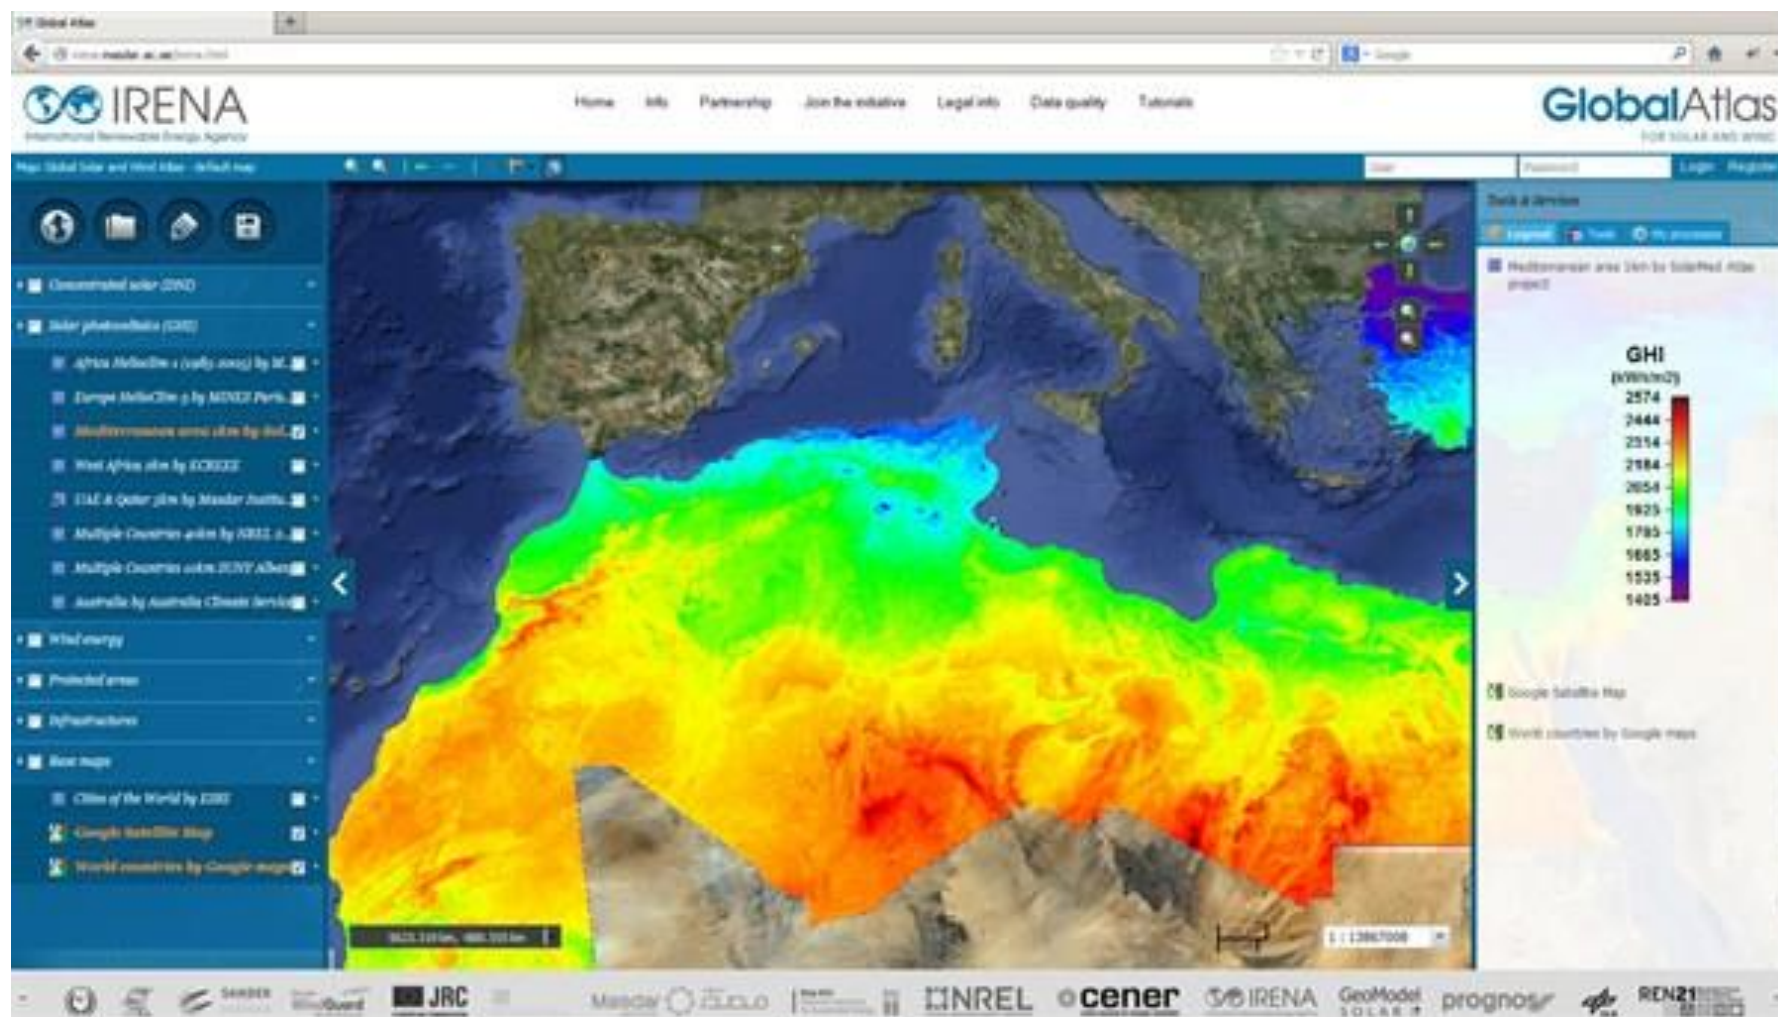

*Estidama is a rating building standard launched by Abu Dhabi Urban Planning Council to assess the sustainability standards of a building

Renewables Readiness Assessment

Global Atlas App

Paris Agreement (COP21)

OPEC concerns

- Founded in 1960 with 14 Member States
- Cost parity of renewables tipping to outperforming the markets.
- Climate change
- Food insecurity
- Labor disruptions
- Terrorism
- Natural disasters
- Peak oil time horizon

Energy Transitions

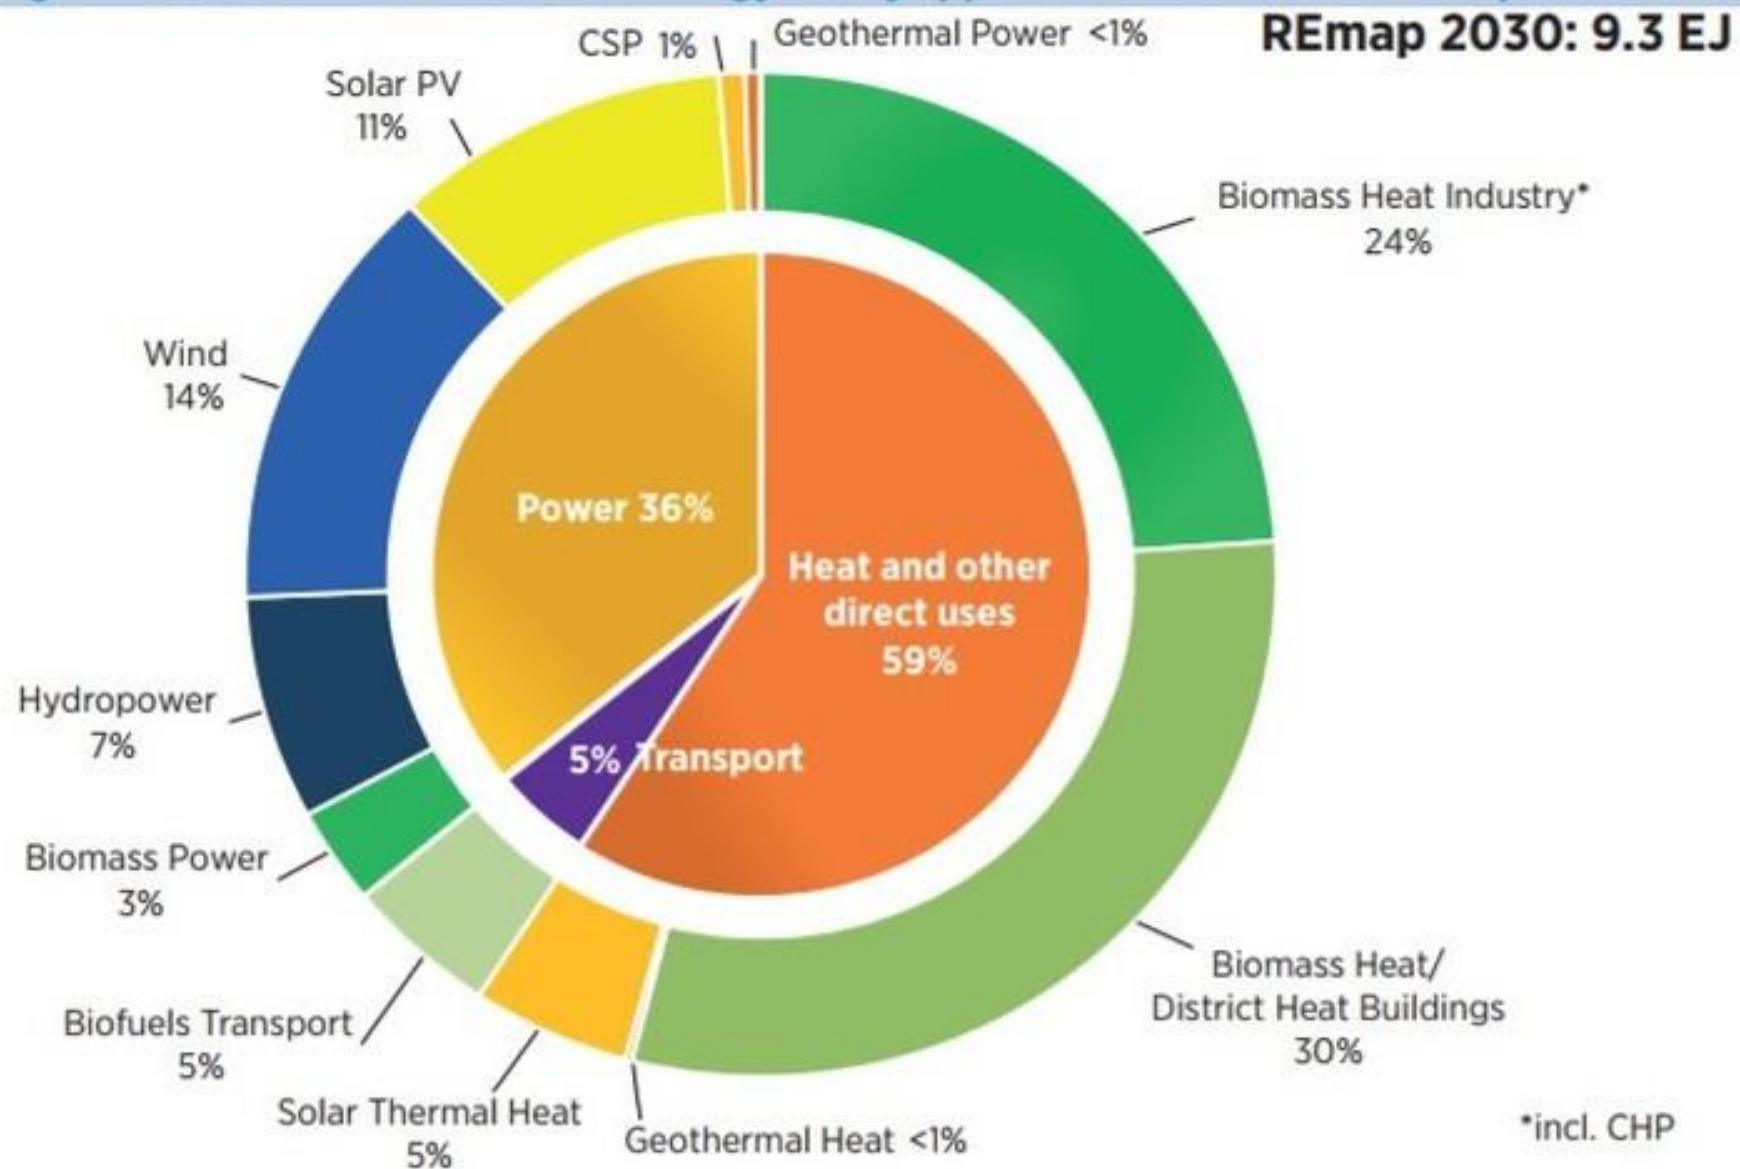

- IRENA as an epistemic institution
- MASDAR
- IRENA REMap 2030

Energy Charter Treaty

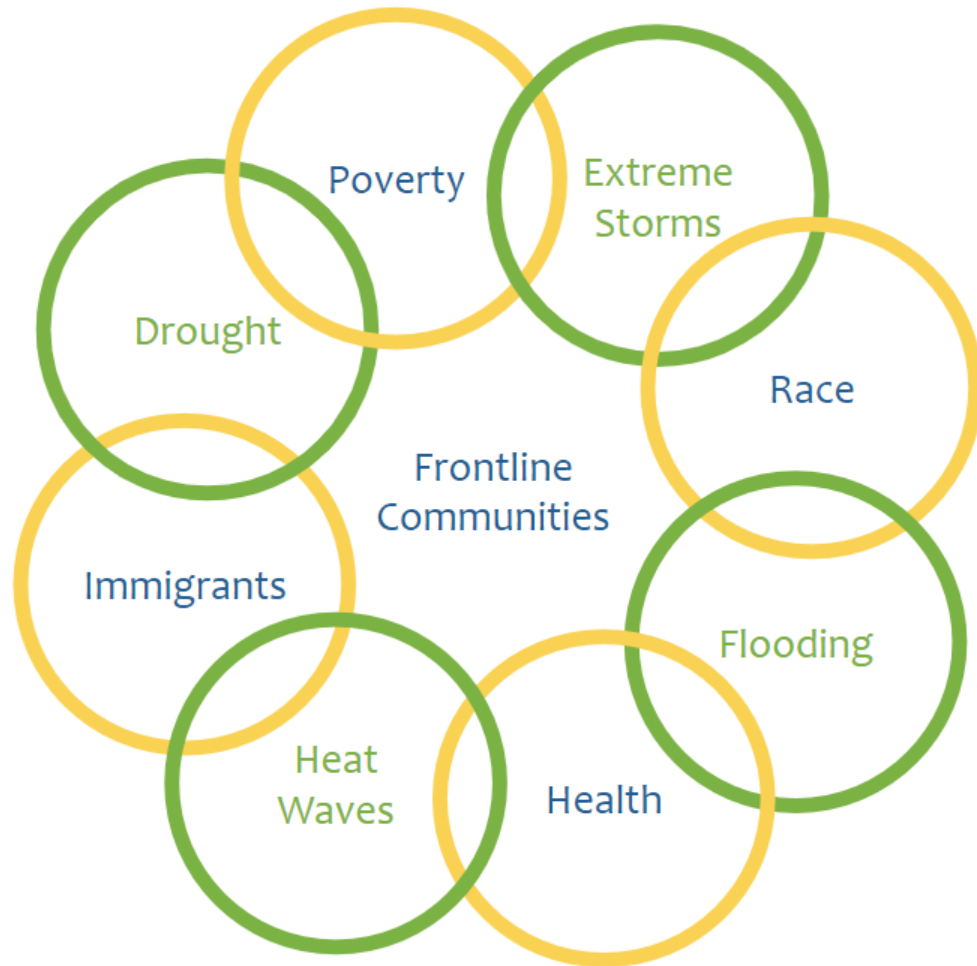

- “The One Treaty to Rule Them All”
- Minimizes effective investor-host country dispute resolution
- Limits climate action
- Locks countries into climate wrecking fossil fuels
- Attracted little attention and remains largely unknown

Figure 5: Breakdown of renewable energy use by application and sector in REmap in 2030

Climate Equity

Small Island Developing States
