Collection & community building through web archiving: engaging with faculty and students in a collaborative web archiving project

Presenter 1 Title

Librarian for Digital Collections

Session Type

45-minute concurrent session

Abstract

Tisch Library at Tufts University has recently begun a pilot web archiving project, aiming to deepen Tufts' collections in areas of strategic importance and support more "traditional" library collection development activities, while collecting material that is not known to be comprehensively collected by other institutions. Additionally, the project offers an opportunity for collaborative collection building with faculty and students that serves as a unique way to deepen our community's engagement with the library.

The initial pilot collection focuses on environmental justice, selected due to its relevance to the Tufts community and curriculum and to build on existing Tisch Library collection strengths. Two undergraduate courses related to environmental justice were identified and invited to partner in the pilot project. This partnership would leverage student research to expand the initial collection while introducing students to concepts of web archiving and information literacy around websites and providing them with the opportunity to contribute to shaping the scholarly record. Both courses added a brief assignment to their syllabus: while doing research on their chosen topics, students would identify 3-7 web sites they felt would benefit from preservation and submit the sites to the library, to be evaluated and added to the web archive as appropriate.

This presentation discusses the process of beginning a subject-based web archiving project, focusing on the collaborative project with two undergraduate classes. It addresses decisions made when starting and scoping the project; collection development issues; the logistics, benefits, and outcomes of the student and faculty collaboration; and future directions.

Future directions (???)

"5/4/2010: To-Do List" by john.schultz, via Flickr, CC BY-SA 2.0

What, and why?

What: A pilot subject-based web archiving project focused on environmental justice, and built in collaboration with two undergraduate classes

Why: goals of the project:

- To explore a new method of collecting born-digital content
- To deepen our collections in an area of strategic importance
- To contribute to the overall scholarly record by collecting material that is not known to be comprehensively collected by other institutions
- To pursue collaboration opportunities with faculty and students in order to increase engagement with our communities, contribute to student learning, and increase the project's output

Starting the project: scoping

Options: topically, geographically, by type of resource

“This collection contains websites, blogs, and social media feeds of citizen groups and non-profit organizations who deal with environmental justice issues. Sites were selected based on their topical and geographic focus: the topical scope includes all environmental justice issues broadly, and currently, the geographic scope is limited to the City of Boston and the cities and towns that comprise Greater Boston. Sites hosted at other educational institutions or governmental sites that otherwise meet the selection criteria are not included.”

“Map of the city and vicinity of Boston Massachusetts”, 1853, via [BPL](#)

Choosing search terms

High level terms

Environmental justice *Climate justice*

Combined with geographic terms

Boston *Greater Boston* *Cambridge* *Somerville*

Plus reading on the subject

Led to more specific terms

asthma *toxic waste* *flooding* *pipeline* *tree cover*

air pollution *Water pollution* *mercury* *water safety*

green space *food deserts* *lead poisoning* *climate change*

healthy food *inadequate transportation* *sea level*

Gathering seeds

Methods:

- Aggressive Googling
- Follow links from already-identified sites
- Search blog domains – e.g. site:wordpress.com or site:blogspot.com
- Look at Facebook pages of identified groups – “Pages liked by this page”

Considerations – ask yourself:

Who is responsible for the content?

What is the content – is it useful/important, or is there a lot of irrelevant content?

Is there unique information – only available on that site or only available online?

Is the content at risk?

Consider context – does the website stand alone, or do additional sites/documents need to be archived along with it?

Boston University proposes to build a BioSafety Level 4 (BSL4) laboratory in the densely populated Roxbury/South End Area. This lab, funded and supported by the Bush administration, would research the most dangerous pathogens known to humanity (e.g. tularemia, anthrax, and the Ebola viruses), many of which can be transmitted through the air. The lab would pose catastrophic health and safety risks to the Greater Boston Area, create a potential terrorist target, undermine public health by diverting research funds to military purposes, operate without community or public oversight, and is opposed by the surrounding community. This website contains information about the proposed Bioterror Lab and the campaign to stop it.

Safety Net
The Safety Net is creating a movement of people of color who have been excluded from the decision-making process to confront power directly and demand fundamental changes in the rules of the game, so that we can achieve our right to a healthy environment. The Safety Net began in 2000 to bring together residents from Meigs Cass Boulevard and Tremont Street in the Roxbury area with a focus on the tenants of the ten housing developments in the area... Green Justice Campaign

Ensuring the 'Green Economy' includes everyone!

Global warming is forcing us to go green, and the 'green revolution' will be as dramatic as the Industrial Revolution. To prevent floods, disease, economic and environmental disruption, we must transform the economy and stabilize the climate. We need to act forcefully, we need to act soon, and we need to act together: communities, political leaders, congregations, environmentalists, businesses and unions.

Today's fluctuating energy prices and declining economy are creating an opportunity as well as a challenge. The green wave can lower energy costs, put people back to work, and jumpstart our sinking economy. It can reshape the state's economy for the benefit of working class people and those who have been most overburdened environmental injustices like pollution and high asthma rates.

In December 2008, the Green Justice Coalition launched a campaign to bring home energy efficiency upgrades and jobs to Boston's low-income communities and make home weatherization affordable and accessible to those communities, increases in wages and job standards for weatherization workers, and other reforms that add up to \$21 for every dollar invested in our home weatherization programs. For details see our evaluation report, Building a Brighter Day.

We are a partnership of community groups, labor unions, environmental groups, and other organizations that support a sustainable, equitable, and clean energy economy in the Boston region. Low-income communities and communities of color have been overburdened by our unsustainable economy. We want to ensure that these communities are at the forefront of the growing green, sustainable economy. We are committed to making sure that our region's growing green economy creates quality jobs, local workforce development opportunities as well as healthier and safer communities.

For news and updates from the GJC, check out our Green Justice Blog and like GJC on Facebook. View the poster from our Energy Efficiency Toolkit here

Environmental Justice at Tufts University

What is Environmental Justice? How is related to all the talk about sustainability? According to the EPA, "Environmental Justice is the fair treatment and meaningful involvement of all people regardless of race, color, national origin or income with respect to the development, implementation and enforcement of environmental laws, regulations and policies." Here at Environmental Justice at Tufts University, we aim to find the intersection between environmental issues and social injustice both on and off campus.

Throughout the semester, a group of us have been dedicating our time to the literatures of people from over the world who are confronting environmental injustice. We've looked at places in South Africa, the United States, Bengal, Ghana, Guaya, and Tanzania to name a few. These communities bear the disproportionate environmental burden of unjust social practices controlled on both a local and global scale. By analyzing a few of situations here at Tufts, we hope to define environmental justice on a large scale, deconstruct those social practices that cause environmental injustice and take action against the same.

April 23, 2015

Principles of Environmental Justice

Delegates to the First National People of Color Environmental Leadership Summit held on October 24-27, 1991, in Washington DC, drafted and adopted 17 principles of Environmental Justice. Since then, The Principles have served as a defining document for the growing grassroots movement for environmental justice.

Environmental Justice, Security, and Sustainability

Women and Water: Fighting for Environmental Justice

Reaching out to faculty

Highlight benefits to the students

- experience with information literacy around websites
- exposure to web archives (a resource they're probably not familiar with)
- the opportunity to directly contribute to a scholarly project – especially important for undergrads who don't always have the opportunity to work on a “real-life” project

“Reach”, by Erica, via [Flickr](#), CC BY NC 2.0

Assignment design

5-page Literature Review Choose an issue in environmental justice that you are interested in and find a set of articles (or book) to review. Write a 5-page (2500-3500 words) paper reviewing this issue, providing an overview of the problem, data and evidence framing the issue, strategies and solutions pursued, and your own critical analysis of the methods and conclusions. Use the readings and themes from the course in your analysis. Try to find books and articles published in the last ten years. If you are reviewing articles, try to find at least 5 sources, with at least 3 from scholarly peer-reviewed sources. Grey literature (by government, think tanks, advocacy groups, and others) are acceptable for the remaining articles.

Collaboration proposal – how will this actually work?

Proposal: Collaborate with students in “Environmental Justice, Security, and Sustainability” to build and expand Tisch Library’s pilot web archiving project focused on environmental justice.

Objectives: Leverage student research on a particular aspect of environmental justice to identify websites to add to the web archive, ensuring the sites’ preservation for future researchers and practitioners; introduce students to concepts of web archiving and information literacy around websites; and provide students with the opportunity to directly contribute to a scholarly project.

Possible workflow:

1. Students are given a brief introduction to the concept of web archiving, reasons why web archiving is important, and the Tisch EJ project.
2. In conjunction with the Literature Review assignment, students are instructed to identify three to five websites that they believe are important for context or research around their topic and that should be preserved for the future. Students will be given basic information about types of sites that are potentially appropriate for the project.
3. By December 15 (due date of the Literature Review assignment), students will submit their list of websites via a Google Form. The form will include a small amount of metadata for each site, including a brief description and a space for students to identify the importance of the site.
4. The Librarian for Digital Collections will evaluate the list of submitted sites for appropriateness, ability to be crawled for the archive, etc., and add to the web archive as applicable. Students will be able to visit the EJ collection web archive homepage to see their work live.

Link submission

Google form:

- Your name
- Website URL to archive
- Please provide a brief description of the site that could be used to describe it on the Archive-It web archive public interface (see <https://archive-it.org/collections/7635> for description examples)
- Why do you think this site is important for the EJ movement?
- Is there anything else we should know about this site?

Environmental Justice, Security, and Sustainability

Use this form to submit websites for Tisch Library's Environmental Justice web archiving project. Please submit 3-5 sites that you have identified as being important for context or research around your topic and that should be preserved for the future.

Note that you must complete this form one time for each link you would like to submit (i.e. if you have 3 links, you will submit the form 3 times)

Any questions? Email Andrea Schuler, Digital Collections Librarian, at andrea.schuler@tufts.edu.

Presentation to students

What

Why

- Increasing amounts of content are available only online. It can disappear or change in an instant
- It's important for future researchers, practitioners, historians, the general public
- Stats on link rot

Wayback Machine vs. Archive-It

Considerations

- There are no right or wrong links
- Types of sites to consider
- Collection development considerations

How

Links were submitted! Now what?

Evaluate each link for relevance to the collection, quality of the site, any IP concerns, and ability to be crawled

Group sites into themes

Re-write scope to reflect expansion of the collection & to guide further scoping

Gather further seeds to flesh out each theme

"wp_fireworks_dual3", by richciani,
via [Flickr](#), CC BY ND 2.0

Evaluation: benefits

The opportunity to engage with undergrads and faculty

Students learn about web archiving & information literacy re: web sites

Faculty subject expertise

Students gathered links that might not come up in “environmental justice” searches

Submitted links helped illuminate important themes

Student-written descriptions saved time in metadata creation

Some excitement from the faculty & students

“Stars”, by Quinn Dombrowski, via [Flickr](#), CC BY SA 2.0

Sept. 19, 2016 issue of The ExPress: Weekly ExCollege News & Ideas

Course Highlight

Each week, *The ExPress* gives readers a glimpse into subjects being taught at the ExCollege this semester. Contact us if you would like to see your class featured, or if you would like to read more about a topic being offered!

Women & Water: Fighting for Environmental Justice

This week we're excited to have Andrea Schuler, Librarian for Digital Collections at the Tisch Library joining us in class to talk about her work. Curious what Digital Collections and Environmental Justice have in common? Digital Collections are one way we can record what's transpiring with these issues so that researchers in the future will also have access to the same websites, blogs, and social media sources we have today. Collecting sources for the Tisch Digital Archives is part of the semester-long projects each student in our class will be working on. In addition to the digital archive work, each student will be working on a paper and presentation about the course topic. Students will choose their own story to research – whether it's a public figure like Rachel Carson (author of *Silent Spring*) or a more hidden story like the fight by four women to stop an oil refinery from being built in New Hampshire's Great Bay in the late 1970's.

Concerns

Is this random?

How to document collecting decisions

Scope creep – is it strictly environmental justice?

Privacy – should I ask for permission to crawl?

Rights

What are people going to use this stuff for?

“questions”, by airpix, via [Flickr](#), CC BY 2.0

Evaluating the project overall

Did the collaboration project actually save me any time? **Probably not**

Did it find things I wouldn't have found otherwise? **Absolutely**

Was it successful overall? **Yes**

What would I change?

Human rights web archive	
Title	Human rights web archive.
Production	2008-
Summary	The Human rights web archive at Columbia University is a searchable collection of archived copies of human rights websites from around the world created by non-governmental organizations, national human rights institutions, tribunals and individuals. Collecting began in 2008 and has been ongoing for active websites. New websites are added to the collection regularly. The HRWA is an initiative of the Center for Human Rights Documentation & Research and is a key focus of the Columbia University Libraries' Web Resources Collection Program. The HRWA was made possible by generous support from the Andrew W. Mellon Foundation.
Restrictions	Browsing and full-text search of archived websites is available without restriction.
Subjects	Human rights. Human rights advocacy. Civil rights. Democracy. Transitional justice. Torture. Women's rights. Indigenous peoples. Refugees. Discrimination. Minorities. Impunity. Political prisoners. Rule of law. Disappeared persons. Genocide. Non-governmental organizations. National human rights institutions. Ombudspersons. Truth commissions. Web archives.
Subjects (Genre)	Web archives

▼ Collection Overview	
Size	About 50 items
Abstract	The University of North Carolina at Chapel Hill and its constituent departments and affiliated organizations began utilizing the World Wide Web in the 1990s. The first campus home page went online in fall 1994. Records include websites harvested through Archive-It beginning in January 2013. The majority represent University of North Carolina at Chapel Hill academic and business units. Also included are websites of some student organizations at the University of North Carolina at Chapel Hill and the website of the University of North Carolina (System) General Administration. All of the websites include active links to web pages of other Chapel Hill campus and university system entities.
