FOR IMMEDIATE RELEASE

KAY TO SPEAK ON KAYPROS AND BUSINESS

Andrew F. Kay, president of Kaypro Corporation, Solana Beach, will discuss how operating ratios that are significantly better than industry averages can be a detriment to a company going public.

Kay, who turned his computer manufacturing company into a national success story in just two years will address an audience on Monday, March 5 at 12:30 p.m. in the Grace Courtroom, top level of the USD School of Law.

"Going Public" is a suitable topic for the company president since making its initial public offering on August 25, 1983. Corporate shares then were priced at \$10. Kay will explain his views on what the move has meant to the family business. Manufactured in San Diego County, the Kaypro personal computer has sold briskly since initial shipments in June 1982. Over 47,500 systems have since been sold.

Kay founded the company in 1953 and served as its chairman, president and chief financial officer. The company was previously known as Non-Linear Systems, manufacturers of the first digital volt-meter. Kay holds a Bachelor of Science degree in General Science from the Massachusetts Institute of Technology.
